Dear Sirs:

Your kind letter and coin received which happens to be a variety that I already have. Possibly you have a specimen which has the small shield instead of the broad one, and if so send it on.

I mean the regular adopted reverse as is found in the cents of 1860 and later.

If you have an 1859 cent with the tobacco wreath reverse send it on.

Dec. 12th/1902

Messrs. S. H. & H. Chapman,

Dear Sirs:

Yours of the 11th received and can explain the matter to you.

When I called at your place in September there were one or two 1858 cents (patterns) which I took at the price marked and paid for same. There were also an 1886 and 1901 (as per memorandum) which your father suggested that I should take along and pay for them later. Before my returning to Washington I called a week later and still not finding you at home, I suggested to your father that it might be more satisfactory all round if I left them again and they were set aside with several other pieces — a Japanese bu and a Spanish coin. Later, on your arrival you quoted me the prices on the different pieces by postal and those that I received were then paid for. This memorandum should have been destroyed or returned the second time that I called but your father could not find it again at the time.

Everything that I kept is paid for. Will explain the matter more fully when I see you again.

(1) Please forward to me by ordinary mail the 1858 pattern small eagle, Rx oak wreath without shield, $1.00

(2) If the Indian head oak wreath with shield, is the ornamental shield, I do not care for it; but if it is the ordinary or regular shield as found on later cents, send it along too.

Respectfully yours,
Chas. H. Deetz,
U.S. Coast Survey.

Hope to see you in Phila. before long.

Perhaps you can inform me on the enclosed postal as to how many varieties there are of the 1858 small eagle pattern cent. I know of two: one with the laurel wreath reverse, and one with the oak wreath without shield. How many others are there?

Dear Sirs?

Kindly inform me if any of the pieces in Lots 189, 190, & 191 of coming sale are struck in pure nickel or if they are of the copper-nickel type as used in the years from 1857-64.

I am looking for the pure nickel variety of 1856.

What does "rough edge" mean in Lot 227? You do not mean milled edge?
